1. Install the tube on the base with screws M8X40mm.

2. Install the side bars on horizontal plates with screws M6X12mm.

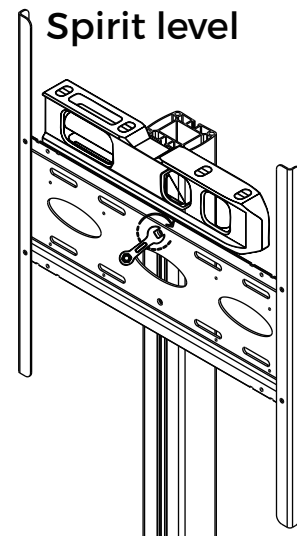

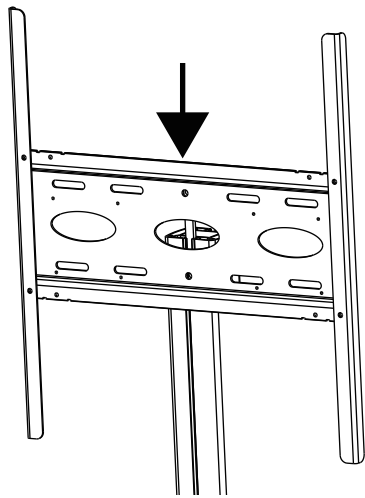

3. Turn back, install the metal slide strip on the back of the horizontal plate with screws M8x14mm. Metal slide strip is under the horizontal plate.

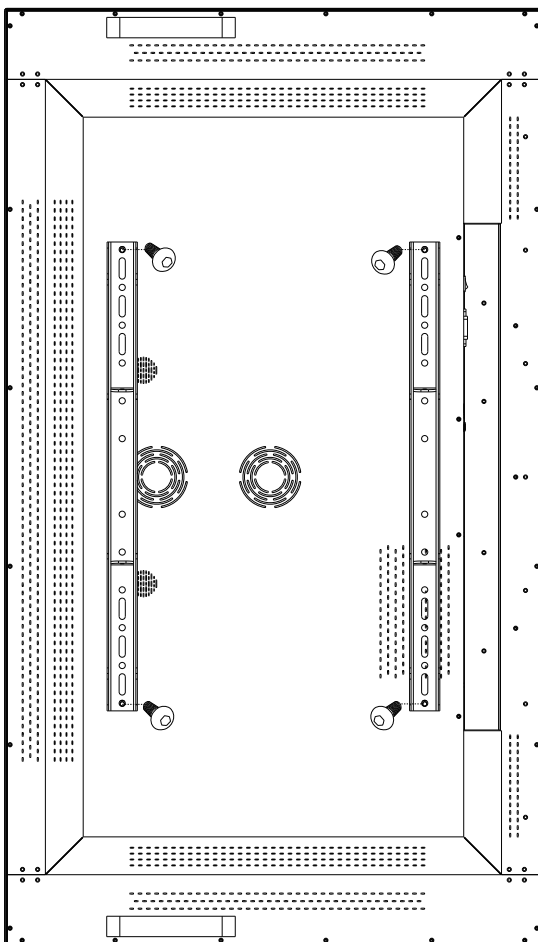

4. Insert the horizontal plate into the tube:

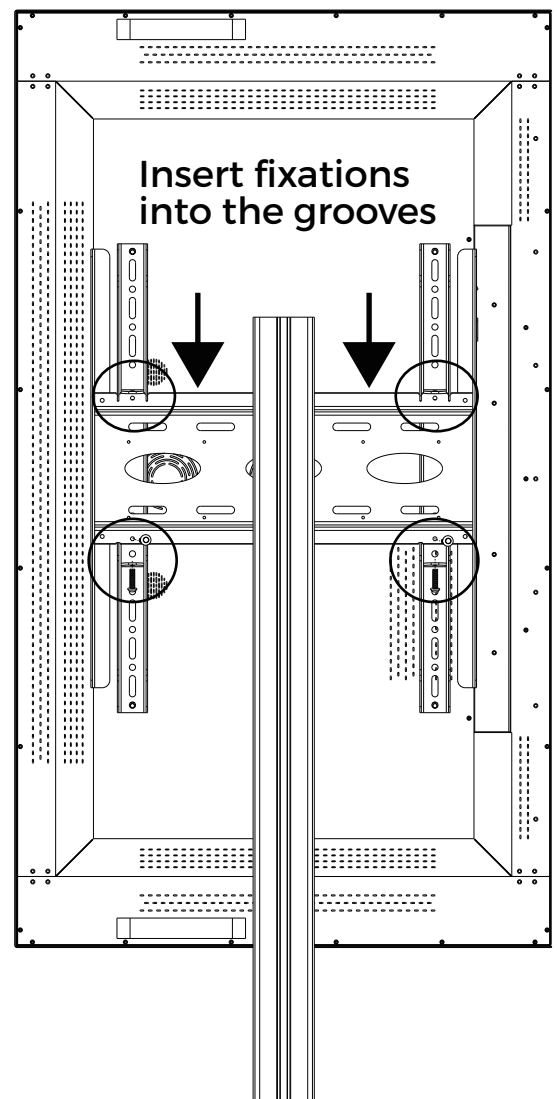

Adjust the horizontal plate with the spirit level, then screw the horizontal plate.

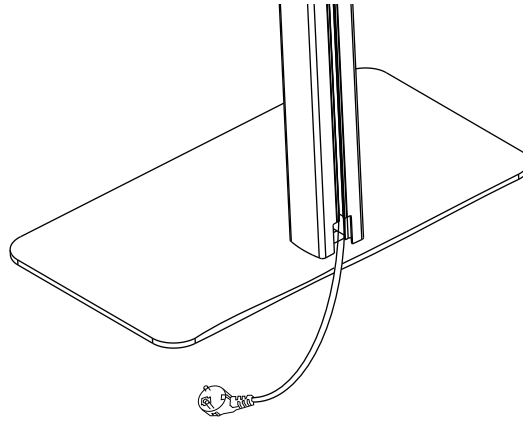

5. Install the vertical hanging bars on the screen with screws M6X12mm, then hang the screen on the stand. Use screws M6X35mm to adjust screen's verticality.

screw the parts in VESA

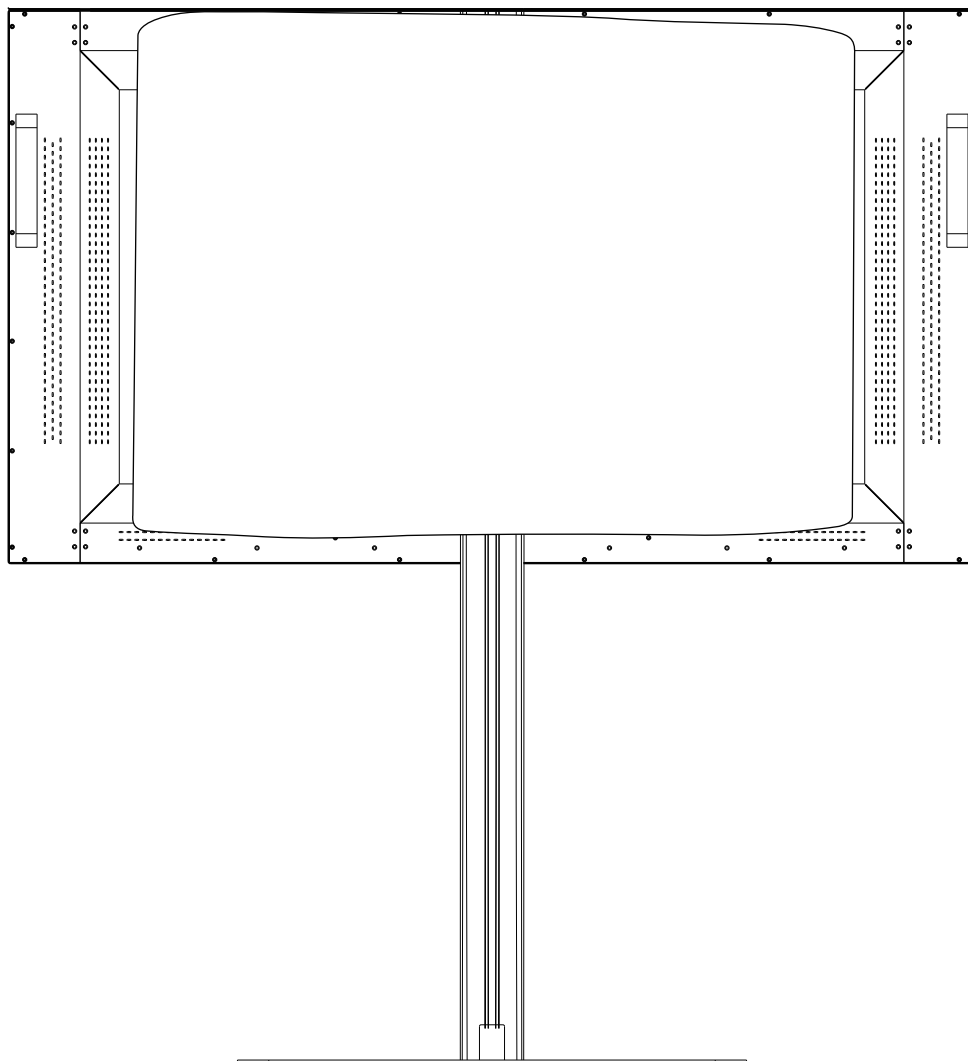

6. The power cord can be hidden inside the tube.

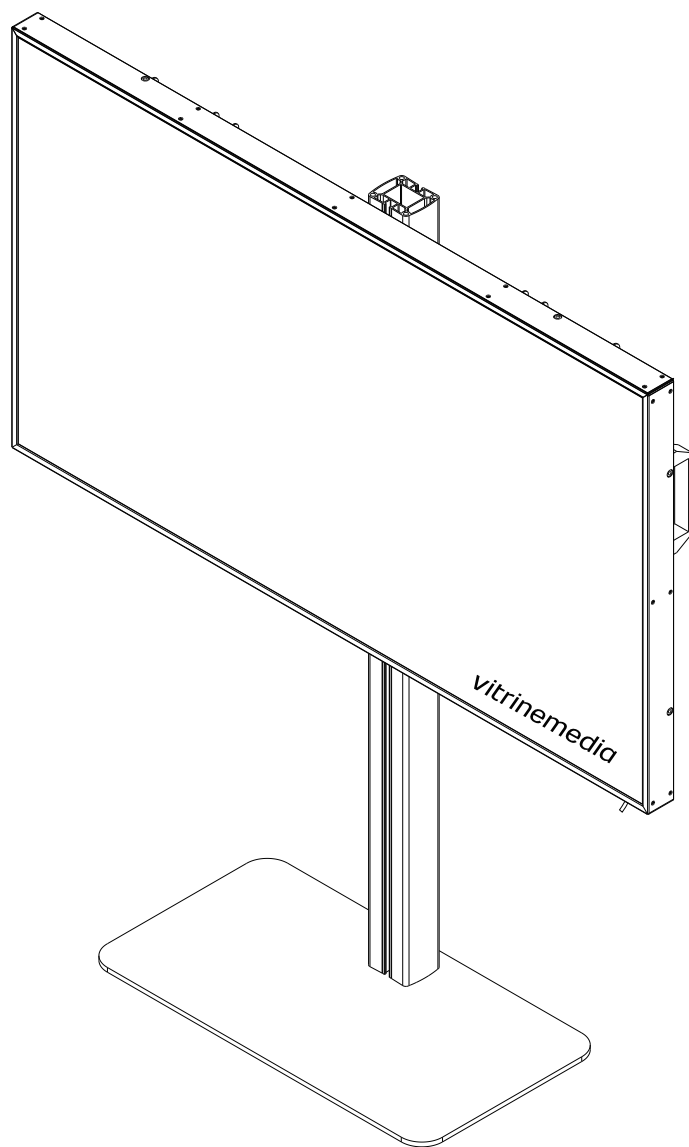

7. Back cover can be used to hide the back of the device (optional).

7.1 To install, use the side magnets of the cover to fix on the side bars.

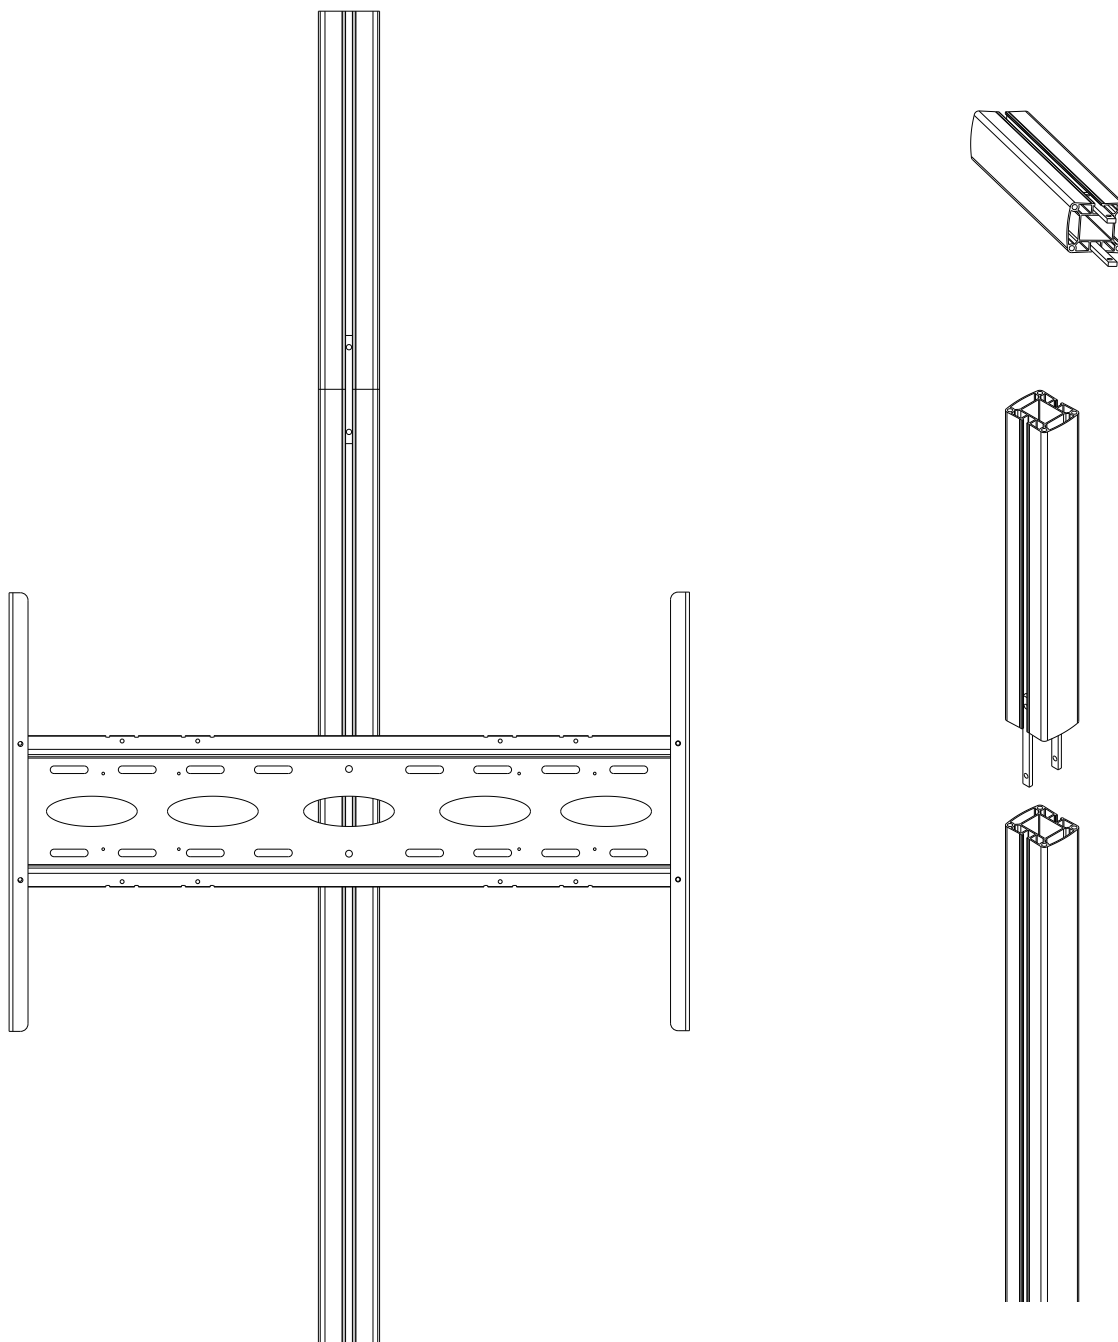

7.2 Textile back cover is compatible and can be installed with the single stand (optional).

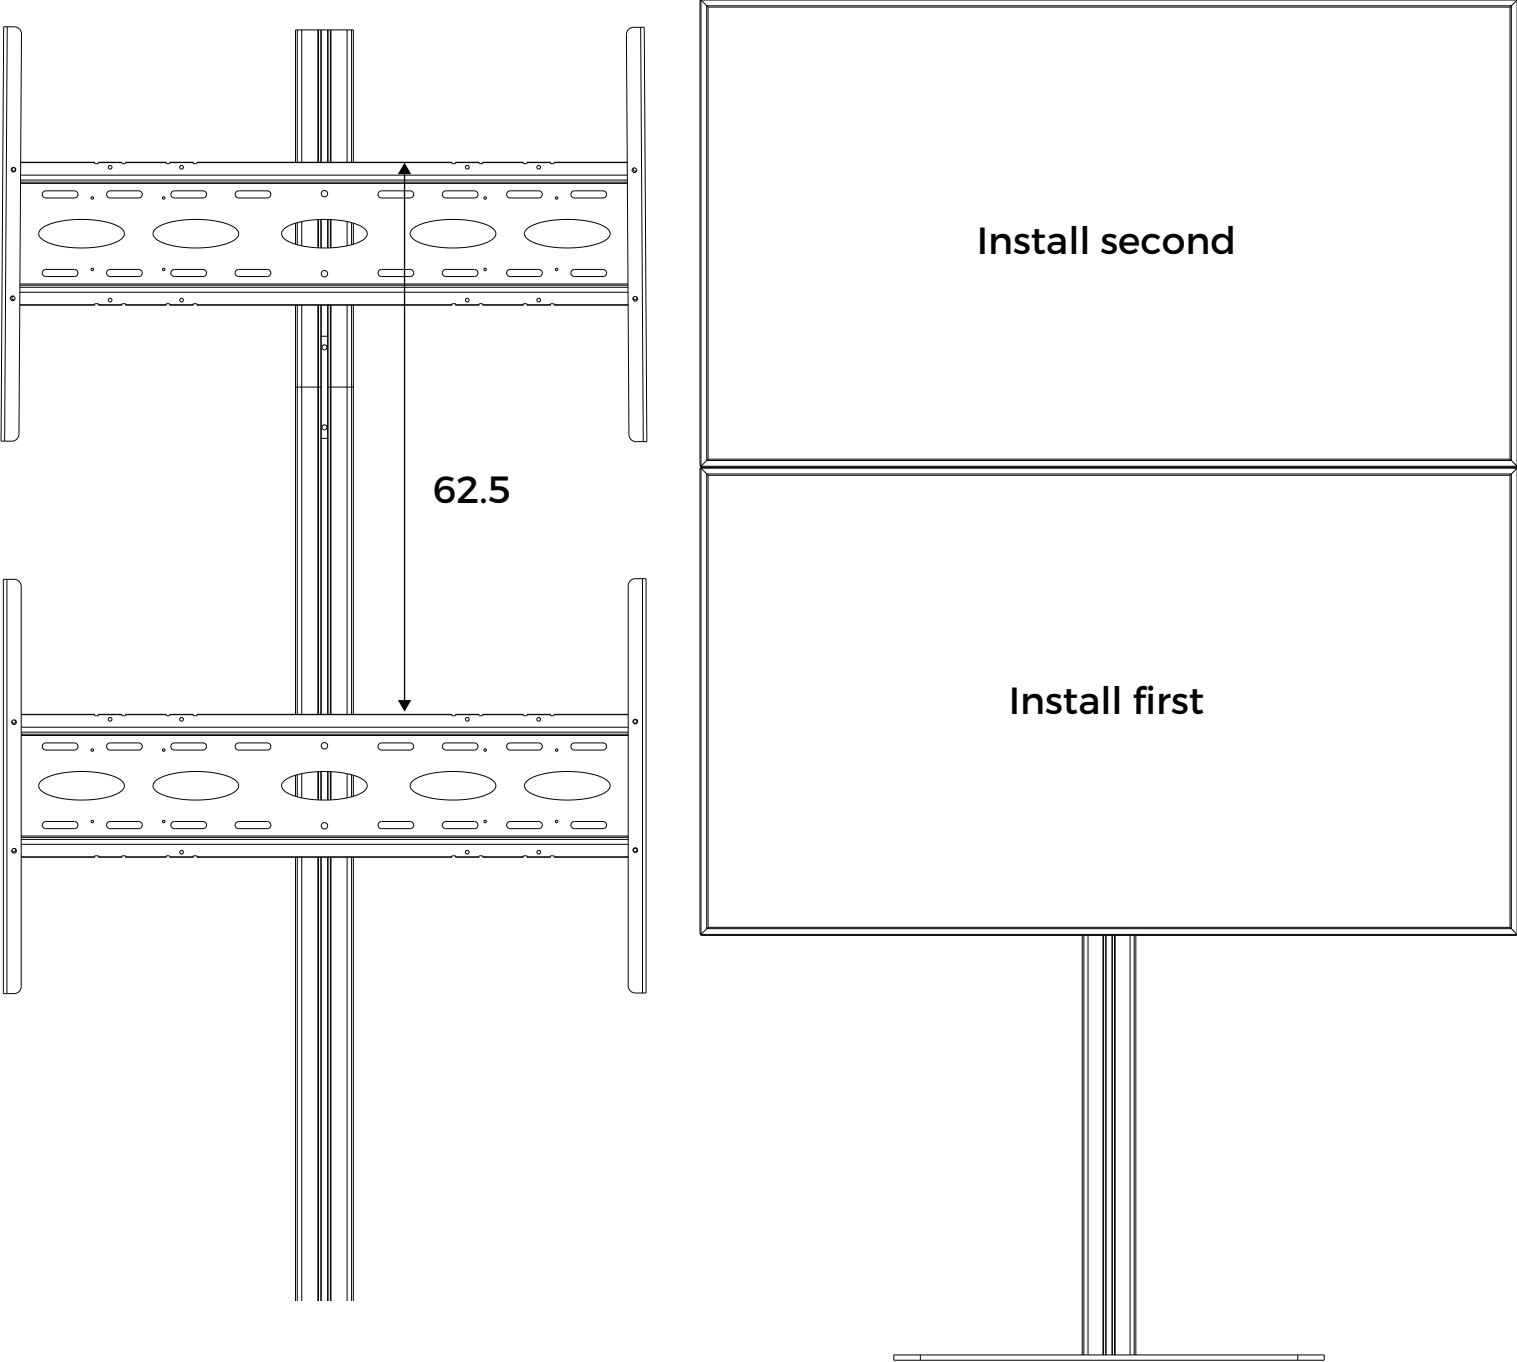

8. Installation with double ESD:

8.1 Insert the first horizontal plate into the tube. Then insert the extension tube into the long tube.

Double ESD installations are only possible in landscape orientation !

8.2 Keep a distance of 62.5cm between the top of each horizontal plates.
The bottom screen needs to be mount first before installing the second screen on top.
